DETAILED ACTION

Claim Objections

1. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. The following examples do not detail every grammatical error in the application:

- a. Claim 1, line 3: the word "positioning" should be "positioned"
- b. Claim 1, line 4: the word "rotation" should be "rotational"
- c. Claims 2 and 3 are written in short hand. The applicant needs to actually write out the limitations.

Allowable Subject Matter

2. Claims 1-12 would be allowable if rewritten or amended to overcome the objection(s) set forth in this Office action.

3. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not teach two three-way discharge changeover means connected to a pressure generating means, where the two three-way discharge changeover means are rotationally positioned 180 degrees apart around the longitudinal axis of the pressure generating means.

Conclusion

4. This application is in condition for allowance except for the following formal matters specified above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire TWO MONTHS from the mailing date of this letter.
